

BOOST YOUR COMPETITIVE EDGE

Increase productivity, cut turnaround times and reduce costs with the industry's leading prepress automation software.

KODAK PRINERGY Workflow is your engine for growth. Powerful automation keeps cost, quality and business risk in control, freeing you to focus on meeting your strategic goals. With support for offset, flexo, digital and gravure, compatibility with virtually all third-party software and equipment, and connectivity to the broadest range of digital devices on the market, PRINERGY Workflow improves productivity and increases profitability.

DRIVE COST OUT

Elevate productivity throughout your operation by automating every core function from job submission through print output, with a powerful solution that reduces manual touchpoints and identifies costly errors before they occur.

BUILD QUALITY IN

Deliver highly tuned, best-in-class output with state-of-the-art color management, screening and file refining capabilities that maximize quality and consistency, even on the most complex jobs.

CENTRALIZE AND STREAMLINE OPERATIONS

Leverage a single, integrated workflow for both digital and conventional printing, eliminating cost and inefficiency, while maintaining operational excellence.

CREATE A CUSTOM SOLUTION

Optimize productivity with customizable automation rules that address your specific business needs and bottlenecks.

DRIVE YOUR BUSINESS INTO THE FUTURE

Quickly adapt to changing business requirements by leveraging an open platform with broad connectivity and flexibility to scale.

Digital Track is an HTML, browser-based solution, showing all digital devices connected to PRINERGY Connect Workflow, including KODAK CTP devices

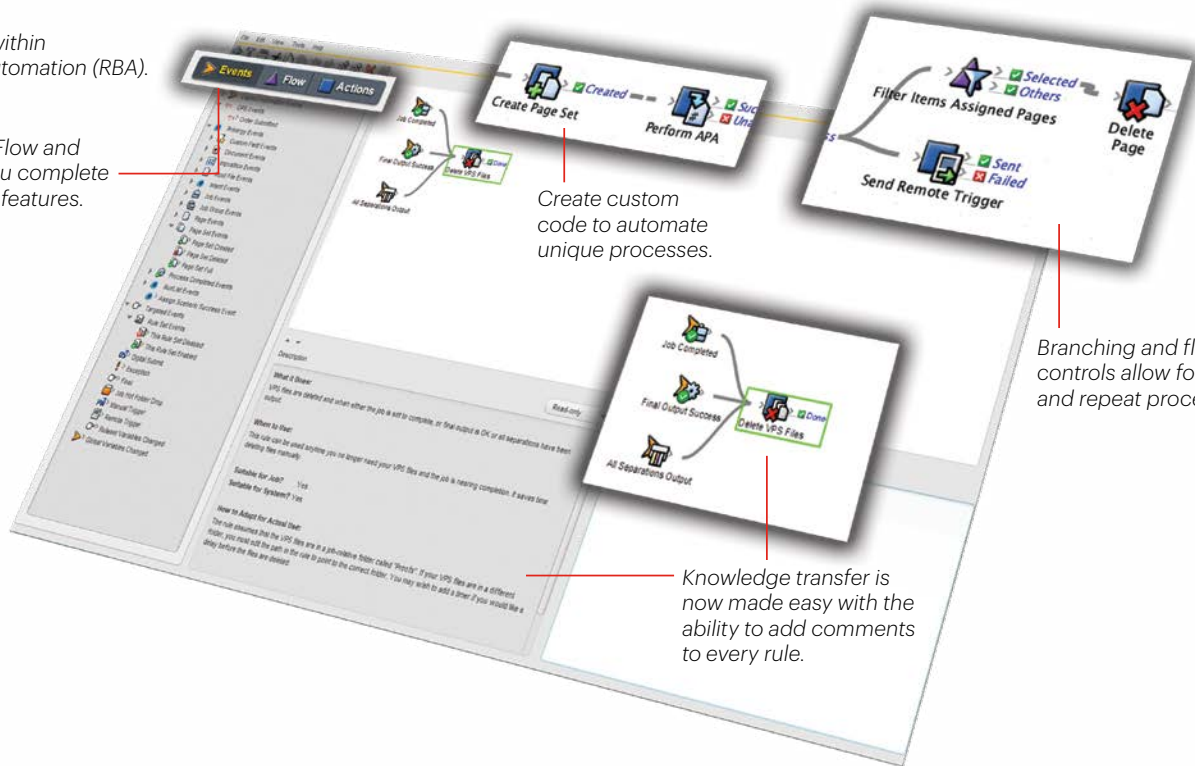

BOOST THE PROFITABILITY OF YOUR DIGITAL BUSINESS

One of the fundamental building blocks of a profitable digital print operation is flexible prepress automation that eliminates cost and inefficiency, and increases utilization without sacrificing quality.

A sample rule within Rules-Based Automation (RBA).

Preset Events, Flow and Actions give you complete control over all features.

Create custom code to automate unique processes.

Branching and flow controls allow for if/then and repeat processes.

Knowledge transfer is now made easy with the ability to add comments to every rule.

INCREASE PRODUCTIVITY WITH RULES-BASED AUTOMATION (RBA)

Replace nearly any manual event, business process, or print production step using RBA. Knowledge transfer is now made easy with the ability to add comments to every rule in PRINERGY 10. A market-proven solution, **RBA has proven to increase productivity by 10-20% and profit margins by 1-2%.**

IMPROVE PROFITABILITY BY REDUCING GUESSWORK

The Business Link option automates data exchange between PRINERGY Workflow and a wide range of MIS systems using JDF. Immediate access to production data enables automation of job setup tasks, improved inventory management and more efficient production processes.

Alternatively, connect, share and automate across your entire organization with PRINERGY Business Solutions, our print-specific end-to-end solution including MIS/ERP, ecommerce and collaboration tools.

OUTPUT TO ALMOST ANY DIGITAL PRESS

Operational efficiency starts with centrally managed jobs going to a variety of digital presses. The Digital Press Management option supports output to devices from Kodak, Canon, Konica Minolta, Komori, Ricoh, Xerox, HP, and Landa, as well as to KODAK CREO Servers and EFI RIPs. An intuitive interface and drag-and-drop functionality make jobs easy to create, submit, and manage.

TRANSFORM PACKAGE PRINTING'S COMPLEXITY INTO YOUR ADVANTAGE

Controlling costs while maintaining brand standards for print quality and consistency is especially challenging in a market that demands shorter runs, versioned content and increasingly complex designs. Kodak's integrated solutions can help.

PRINERGY Workshop allows users to swap out artwork within a layout without opening the layout to do so, simplifying last-minute changes.

Changes to ADOBE ILLUSTRATOR or ADOBE ACROBAT artwork can be made from within PRINERGY Connect Workflow.

Intuitive user interface makes it easy to process jobs with repeatability.

REDUCE OPERATING COSTS BY AUTOMATING PRESS SHEET LAYOUTS

Reduce layout time, improve accuracy and minimize waste by automating combination runs with KODAK PANDORA Step-and-Repeat Software.

Generate complex press sheet layouts automatically with the Packaging Layout Automation (PLA) option using either new or existing templates, or previously-used production layouts. Maximize media usage, drive accuracy and save time by eliminating redundant data entry.

IMPROVE FLEXO QUALITY WITH UNIQUE SCREENING SOLUTIONS

Innovative screening technologies dramatically improve print quality, in flexo applications. Award-winning KODAK DIGICAP Patterning applies micro-surface texturization to improve ink transfer efficiency and solid ink densities.

KODAK Advanced Screening is a hybrid AM/FM technology that overcomes highlight and shadow reproduction limitations.

KODAK HYPERFLEX Imaging Software produces smaller, more stable dots, reproducing highlights more accurately and smoothing vignettes and transitions.

REPLACE EXPENSIVE SPOT COLORS WITH PROCESS INKS

Transform a library of spot colors into easy-to-manage digital libraries of 4-, 5-, 6-, or 7-color process recipes based on a print condition with KODAK SPOTLESS Software.

A COMMITMENT TO INNOVATION

Kodak continues to invest in both performance and security with upgrades released automatically every 9 months, on average, to customers with a service contract. Using the latest version ensures security compliance and access to time and cost saving features.
